## **Practice B LESSON Point-Slope Form - Weebly**

And the clue here is that they say a slope of negative two. So one way to think about it is, we can start at the point that we know is on the line, and a slope of negative two tells us that as  $x$  increases by one,  $y$  goes down by two.

## Acces PDF Algebra 1 B Point Slope E2020 Answers

The change in  $y$  would be negative two. And so this could be another point on that line.
