Apple DuoDisk 5.25 - APPLE2.ORG.ZA - Mirrors

The DuoDisk drive is supposed to be connected to the motherboard with a 5.25" disk controller card (although other controller cards can be used). Thought #2: The Apple part number you gave, "590-0037-B" after searching on Google, is a serial printer cable. Thought #3: The correct part number for a Duodisk cable is 590-0114.

Duodisk Repair Help | Applefritter

Apple Duodisk, A9M0108. Introduced in 1984 slightly before the Unidisk, it contains two 5-1/4" Unidisk drives mounted side by side in a beige enclosure. Designed to sit between the computer and monitor. The Duodisk drive has a unique, removable cable that runs from the drive to a drive interface card - either the I/O Controller (Duodisk) Card or the 5.25 Drive Controller Card as it was later named.

Old Apple Stuff - Apple // Manuals

After keeping my eyes on eBay for a long time, I managed to finally score an Apple II DuoDisk. I've seen plenty come and go, but they were either too expensive (over \$100 bucks), or they nailed you on the shipping. I admit, this one looks like it's seen better days, but at least it was only \$40 bucks. It also includes the floppy cable.

Apple - Support - Manuals

Mainly, this mini-manual covers DOS 3.3. There is a short 'intro' section on ProDOS at the end. DOS "DOS" means "Disk Operating System". A DOS is a collection of machine language routines and data which lets a computer Read and Write information to/from disk. Apple II DOS, Commodore 64 DOS, and the DOS used on PC's are all called "DOS";

Macintosh and Apple II Books and Manuals

In 1983, along with the introduction of the Apple IIe, Apple initially offered a combination of two, two third-height, 140-kilobyte Disk II drive mechanisms side-by-side in a single plastic case, called the DuoDisk 5.25 (A9M0108), which could not be daisy-chained. The unit was designed to be stacked on top of the computer, and beneath the monitor.

Disk II - Wikipedia

The Apple IIe was a late replacement for the surprisingly long lived Apple II line. It had twice the RAM, twice the ROM, 80 column support and upper and lower case support built in. Related Items in Collection: Duodisk 5.25" floppy drive, some manuals, Apple II software plus other Apple II class computers including Apple IIe Platinum and Apple IIc
