The ENERSTAT-T can be set with two temperature levels. The lower, or setback level, is the background temperature that is maintained to keep an acceptable level of warmth, preventing frost and allowing the room to heat up quickly when required. The higher, comfort or boost level provides a comfortable temperature level when the room is occupied.

Each zone thermostat provides the complete and independent control for that zone. You can think of each zone as having a separate heating/cooling system with its own thermostat. Each zone Thermostat determines the operation of the heating and cooling system so you should refer to your Thermostat Manual for information on how to "operate" the system.
