### Evolution Engine Problems

The Evolution (Evo) engine is a V-twin engine that has been manufactured by Harley-Davidson since 1984 for a variety of different motorcycle models. The engine design is often credited with saving Harley-Davidson from bankruptcy after the management buyout and subsequent reorganization that the company went through during the early 1980s.

### A brief history of the Harley-Davidson Evolution Engine

The Harley Evolution engine helped bring Harley-Davidson back from bankruptcy. This was a major design advance for Harley-Davidson in many ways, the Harley Evolution engine is most distinct from earlier Harley-Davidson engine designs by due to its reliability, oil tightness, and ability to run hard under all circumstances, thousands of miles ...

### Harley Evolution Engine 1984 - 1999 Overview | FMH Video

Due to the Evolution engine's all-aluminum construction, there were a few problems early on with finding the right bottom end gaskets. The rapid expansion and contraction of an aluminum engine caused many cylinder base gaskets to squish, and leaks are not unheard of, he says.

### Harley-Davidson The Evolution During The 1980's | Baggers

The first Evo was a shovel based engine, with the Evo, non-vented heads. HD bought back the company from AMF in Feb of 1981, with it completely final (sale) in June. The Evo was released in 1984-1/2, 3 years later. It was Harley's answer to the leaky, low quality control issues with the Shovelhead engine.

### Evo .vs. TC -- what are the strengths/weaknesses of the ...

The Evolution engine (popularly known as Evo) is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles.It was made in the 1,340 cc (82 cu in) displacement for Harley-Davidson Big V-twins bikes, replacing the Shovelhead engine until 2000 when the last EVO was placed in a production factory custom FXR4 (FXR2 and FXR3 were the first CVOs).

### Harley-Davidson Evolution engine - Wikipedia

The only major problem I can tell with the evolution motor is the fact that lifters need replacement every 40,000 miles, but that is an EASY job to do... and the crappy stock INA cam bearing that needs to be swapped out with a torrington which is also an easy job to do.

### Evo engine vs Twin cam | Adventure Rider

HARLEY TWIN CAM ENGINE DESIGN PROBLEMS The Harley Evolution engine is probably the most durable motorcycle engine ever produced, to include the German and Italian makes and certainly all of the Japanese engines. There have been at least two documented cases of Evolution engines exceeding 400,000 miles without a rebuild, one of which went ...
