Make sure the surfaces and bores of baffles have a perfect symmetry and alignment to each other to prevent the blasting bottle-shaped gas from overtaking and deflecting the bullet. You also don't want bullets to make contact with baffles, nor do you want them to tumble and keyhole. Use stainless steel or Inconel to make the blast baffle.

A Faraday cage works by three mechanisms: (1) the conductive layer reflects incoming fields, (2) the conductor absorbs incoming energy, and (3) the cage acts to create opposing fields. All of these work to safeguard the contents from excessive field levels. A Faraday cage is particularly useful for protecting against an electromagnetic pulse that may be the result of a high-altitude nuclear ...

To build a cardboard playhouse, start by choosing a large box and cutting off the bottom flaps. Next, cut out a vertical rectangle for a door, leaving one edge uncut so you can open and close the door. After that, you can cut out as many windows as you'd like in the side walls of the house. Then, grab the two flaps you initially cut off and ...
