Logic is one of the major branches of philosophy, which is commonly understood as the science or study of correct processes of thinking or reasoning. Broadly construed, logic, therefore, is that specific branch of philosophy that studies the processes of correct thinking. Etymologically speaking, the term "logic" is derived from the Greek word logos, which is often translated in English as "word", "discourse" or "reason".

### What is Logic? - Introduction to the Logic - PHILO-notes

This course introduces students to techniques for evaluating deductive arguments. Our study of deductive reasoning will consist in the development of three different logical systems: categorical logic, propositional logic, and predicate logic. Categorical logic (a.k.a. syllogistic logic) — which formed the basis of logic for over two thousand years — is the study of arguments whose constituent sentences express certain relations between classes(or categories) ...
