basic risk management and insurance principles. Build a foundation in insurance functions and regulation, the risk management process, and the claims and underwriting decision processes.

## **Risk Management Education | The Institutes**

- Risk Management is a process that identifies loss exposures faced by an organization and selects the most appropriate techniques for treating such exposures
- A loss exposure is any situation or circumstance in which a loss is possible, regardless of whether a loss occurs - E.g., a plant that may be damaged by an earthquake, or an automobile that may be damaged in a collision
- New forms of risk management consider both pure and speculative loss exposures
