The iOS SDK, formerly the iPhone SDK, is a software development kit developed by Apple Inc. The kit allows for the development of mobile apps on Apple's iOS operating system. While originally developing iPhone prior to its unveiling in 2007, Apple's then-CEO Steve Jobs did not intend to let third-party developers build native apps for iOS, instead directing them to make web applications for the Safari web browser. However, backlash from developers prompted the company to reconsider, with Jobs an
