Using an MIS system can improve the performance of a company in many ways. R. Kelly Rainer, Jr., George Phillips Privett Professor at Auburn University and Co-author of Management Information Systems, Moving Business Forward, says, "Any organization that does not use MIS simply will not exist for long.

The Role of Management Information Systems | Smartsheet

A management information system is an information system used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization. The study of the management information systems involves people, processes and technology in an organizational context. In a corporate setting, the ultimate goal of the use of a management information system is to increase the value and profits of the business. This is done by providing managers with timely and approp
