Build your own low-level game engine in Metal! Metal is a unified application programming interface (API) for the graphics processing unit, or GPU. It's unified because it applies to both 3D graphics and data-parallel computation paradigms. Metal is a low-level API because it provides programmers near-direct access to the GPU. Finally, Metal is a low-overhead API because it reduces the ...

I just finished reading Raymond Wenderlich's The ABCs of SUCCESSFUL LEADERSHIP. It took me a few pages to get into the style of his writing -- a point made, per page, surrounded by lots of white space. I realized that Mr. Wenderlich had written his thoughts in the style that we read and write in today -- email, IMs, and texting.
