Termite Facts for Kids. All termites are social insects and raise their young as a group. The total weight of all of the termites in the world is more than the weight of all the humans in the world. Termite colonies eat non-stop, 24 hours a day, seven days a week! Termites have wings that they shed once they have found a good place to build a nest.

Termite Facts for Kids: Termite Information for Students

Biology differs from the more common subterranean termite because it does not nest in the ground and thus requires a different, more expensive treatment approach. Termites are medically harmless. Subterranean termites: Worker termites tunnel into structural timbers and other sources of cellulose on which they feed. Termites are harmless to man and animals although soldier termites can bite.
